

Data Science with Python Expert Internship

Internship Presentation

NAME: ISHA NEGI

25SCS1003002767

2CSE11 | 3RD SEM

IILM University, Greater Noida

Internship Overview

Program Name	Data Science with Python Expert Internship
Partner Organization	Henry Harvin Education
Platform	Skill India Digital Hub (MSDE)
Duration	1 Month (4 Weeks)
Domain / Sector	Data Science & Engineering / IT-ITeS
Mode	Virtual / Online

The Data Science Pipeline

Python Libraries Focus (Curriculum)

Supervised vs Unsupervised Learning

Feature	Supervised Learning	Unsupervised Learning
Data Type	Labeled Data (Input + Output)	Unlabeled Data (Input only)
Goal	Predict outcomes based on past data	Discover hidden patterns & structures
Algorithms	Linear/Logistic Regression, Decision Trees, Random Forest, SVM, KNN	K-Means Clustering, PCA, Apriori
Complexity	High computation, simpler evaluation	Complex evaluation, needs domain expert

ML Algorithm Performance (Example Case Study)

** Random Forest typically demonstrated the highest accuracy due to its ensemble nature, reducing overfitting compared to single models.*

Key Achievements & Skills

Data Cleaning Mastery

Handled missing values, outliers, and feature encoding on raw datasets.

Advanced Visualization

Created correlation heatmaps and distribution plots using Seaborn.

Predictive Modeling

Trained, tuned, and evaluated supervised ML algorithms.

Business Acumen

Translated raw data insights into actionable business strategies.

Thank You
